Giant made in Holland

Wheelloaders

To full fill the needs and demands of her customers Tobroco offers a wide range of wheel loaders. This range consists out of 25 different types of loaders with a service weight between 1000 kg and 4150 kg. In this leaflet, we will show you the range of Giant with a service weight of 23500 kg to 2770 kg. These loaders are powered by a 36 hp Kubota engine or a 45 hp Kubota turbo engine. For further information about other types and implements we refer to our other leaflets or our website (www.tobroco.com).

● V362

The Giant V362 is with its 36 hp Kubota engine, the lightest loader in this range. This loader has regular axles (no planetary), one gear and speed up to 18 km/h. Because the motor cover can topple over, the new models are even better accessible for maintenance and service. These models are very suitable if you work on a flat surface and have to transport a load within a small area. These loaders are used very much on horse nurseries.

● V452T & V452T X-tra

The Giant V452T and the Giant V452T X-tra are our smallest wheel loaders with two gears and heavy planetary axles with automatic differential lock in our assortment. The loaders are powered with a 45 hp Kubota turbo engine. Also the well known "X-tra" versions are available in this new design. Because of the lower front frame these Giants have a higher tipping load, even through the machine is very light and complete. Like the previous models of these types, they are optional also available with 3 point lifting mechanism (cat.1) including a 4th function mechanical and PTO.

Giant attachments

Here is a part of our wide range of attachments. The complete range of attachments can be found in the folder "attachments" or on our website (www.tobroco.com).

Technical data

● V452T HD & V452T X-tra HD

Because of the demands of our customers for a Giant with a higher driving speed, Tobroco Machines has developed the Giant V452T HD and the Giant V452T X-tra HD. The heavy transmission (Heavy Duty, 12 tons axles) has the advantage of high speed (up to 28 km/h) and at the same time higher performances. Because of the higher service weight the HD models will give higher tipping loads than the normal Giant V452T and the Giant V452T X-tra.

Tippingload in straight position, without extra counterweights.

Wheelloaders

Giant wheel loaders are totally designed and produced in own management in Oisterwijk (the Netherlands). In 2009 Tobroco Machines started with the development for new models for the existing range. These new models will replace the existing ones. For development Tobroco Machines is using a sophisticated 3-dimensional design program. This way a machine is already tested on performance before it got in production. During the development of the new models Tobroco takes care of the demands and needs of her customers. The models are upgraded in especially looks and comfort. When you compare performance and technical data the new models are at least equal or are upgraded. Also Tobroco Machines offers you a very big variety of implements. The majority of these implements is designed and produced by Tobroco Machines, and because of this, the implements are optimal adapted for your Giant, which is more efficiently this way. Starting January 2010 Tobroco Machines will have a new production plant of ± 10.000 m². On demand you can visit this factory. Tobroco Machines also has her own transport and service facilities for the Benelux. On customers request we can provide our transport and service.

All technical data in this brochure refer to series models that have been tested under operating conditions typical of Central Europe and describe their standard functions. Specifications and their modes of functionality as well as accessories listed in this brochure depend on the individual model and on the options available with a particular product as well as the statutory requirements of the country of sale. Illustrations used in this brochure may show products that have not been mentioned or that are not available as series production machines. The descriptions, illustrations, weights and technical data published herein are non-binding in nature and represent the technical status at the time the document went to press. Because of ongoing development, we reserve the right to make changes, without prior notice, to the design, specification, visual appearance and technology of our products. Should you require special functions that would be available only by using additional components and/or under special circumstances, please feel free to contact us. We will be happy to answer any questions you may have and to provide further information regarding whether and under what conditions applying to the product and the target environment such special functions might be feasible. If you have any concerns about the load capacity or operation of our products in certain working conditions or environments, we recommend that you perform a test run under controlled conditions. Despite meticulous attention to detail, we cannot exclude the possibility that our products may not conform to illustrations or stated dimensions, or that errors may have occurred in calculation or during printing, or that the information given here may be incomplete. Consequently, we do not accept liability for the accuracy or completeness of the information supplied in this brochure. All matters relating to our product warranty are contained within our General Terms and Conditions. We expressly decline to provide additional guarantees. Any liability over and above that contained within our General Terms and Conditions is excluded.
